

# Webcasting Requirements

For the best possible viewing experience we recommend the following system requirements:

- Display resolution of 800 x 600 pixels or greater
- Windows-compatible sound card
- Microsoft Internet Explorer 6.0 SP1 or above
- Windows Media Player 10 or above
- Broadband Internet connection (384 Kbps & above)
- Allow ActiveX plug-in to be installed

Please visit this link to test your system to ensure that it will work:

<http://abstract.osgoode.yorku.ca/opdwcmgr.nsf/Login?OpenForm&wcst=test>

Username: test  
Password: 6c271

If you are able to view this demo, you have passed the system requirements. Within this demo, there is a section help which gives you the specific requirement if you weren't able to view the webcast.

Here are a few ports you need open on your company's firewall if you are not able to view the demo (you might have to contact your IT Dept to set these):

rtsp protocol 554

mms protocol 1755

http protocol 8080

## ***APPLE/MAC USERS***

Apple computers will need a Windows Media Components for QuickTime by Flip4Mac.

<http://windows.microsoft.com/en-US/windows/products/windows-media-player/wmcomponents>

Please note that Iphone/Ipad are not supported at this time.

If you have are having difficulties connecting to the demonstration or if you have any questions please contact our IT department at (416) 736-5737.
