Artificial Intelligence: Confronting the Legal and Ethical Issues of AI in Business

Take advantage of this unique opportunity to learn about the conditions for AI success. Position yourself as a trusted strategic advisor to clients navigating the myriad legal, regulatory and logistical snares surrounding artificial intelligence and its applications.

The rapid development and implementation of artificial intelligence and related technologies has already begun to disrupt and revolutionize the economic system in Canada and other countries. Change is here. Change can present challenges, but change also presents opportunities. The question is to determine how the legal system can best foster the development of this new business sector by truly understanding the nature of artificial intelligence.

This half-day program focuses on a broader discussion about the standards that should be associated with the transparency of AI systems, particularly when used in the context of AI related research, ethics and design rules to govern AI work in business initiatives.

Who Should Attend?

- Legal practitioners looking to understand how AI will disrupt, augment or change their core business
- Individuals interested in new technologies that affect law and legal practice
- Mid to senior executives in AI-sensitive organizations looking to apply AI to real problems
- Individuals who want to broaden their perspectives in AI, acquire new professional skills, refresh their knowledge, exceed their goals or gain competitive advantage
- Policy Makers
- Technology Entrepreneurs
- Management consultants and technology consultants
- Business Owners

Topics Include:

- What is Artificial Intelligence (“AI”)? How Does It Work? What Are the Potential Implications of AI in General, and for Your Practice?
- What are some of the practical and ethical concerns associated with AI?
- What are some of the practical applications of AI in the legal profession?
- Implications of data privacy and use of AI systems
- Overview of the privacy regime in the context of access to data for AI companies
- Current issues facing AI companies as they relate to privacy legislation
- Approaches to anonymizing data for AI

LegalAI

© Ossoode Professional Development, 2018
This speaker will focus on the use of AI in the practice of law.

- How does AI serve the legal profession?
- What are some of the practical applications of AI in the legal profession?
- What are the conditions for success for incorporating AI in law?

10:45 a.m.
Refreshments & Networking

11:00 a.m.
Data and Privacy in an AI-Driven Economy: Concerns and Opportunities

Julie Chapman, General Counsel (Canada) and Chief Privacy Officer, Lexis Nexis Canada

AI requires large quantities of data to build and train systems. This speaker will discuss legal issues arising from the data needs of AI systems.

Topics of discussion include:
- Implications of data privacy and use of AI systems
- How do ICOs fit into our legal rubric for securities offerings?
- Current issues facing AI companies as they relate to privacy legislation

11:45 p.m.
Identifying Key Legal Issues with AI Deployment in Business

Carole Piovesan, AI Lead, McCarthy Tétrault

This speaker will survey the legal landscape to identify intersections between AI and the law.

Topics of discussion include:
- How to apply a legal lens to the understanding of AI
- Emerging issues resulting from AI incorporation: Is AI changing the law? If so, how?
- Anticipated legal issues: Competition, IP, trade and tort law

12:30 p.m.
Program Ends
